

QUALITY POLICY

Tank Solutions provides a range of steel and fibre glass tanks for above and below ground applications to the chemical, fuel, mining and water industries.

Management is committed to provide products that meet the requirements of our customers and satisfy applicable legal requirements.

The quality management system shall be appropriate to the purpose and context of the organisation, aligned to the strategic direction and providing a framework for setting objectives to ensure customer satisfaction and the future success of the company – which involves:

- Monitoring and measuring our products, processes and services against targets as part of the continual improvement process.
- Communication to all company personnel who understand their individual roles and responsibilities in the quality management system.
- Exchange of information from our interested parties that include customers and suppliers – reacting to any positive or negative feedback for continual improvement of products and processes.
- Provide on-going training to ensure a competent workforce.
- Maintenance of the quality management system in accordance with AS 9001:2015 and applicable regulatory requirements.
- Review of the company objectives to assess results and trends.
- Review of the quality management system to ensure continuing suitability, adequacy and effectiveness.

Tank Solutions will continue to support its quality endeavours through investments in training, technology and equipment upgrades.

This policy is available to relevant interested parties as required.
